Re: CBS Radio East Inc.
KYW (AM), Philadelphia, Pennsylvania
Facility Identification Number: 25441
Special Temporary Authority

Dear Mr. Benedict:

This is in reference to the request filed April 4, 2011, on behalf of CBS Radio East Inc. ("CBS"). CBS requests extension of the special temporary authority ("STA") granted on October 18, 2010, to operate Station KYW with parameters at variance and/or reduced power while maintaining monitor points within licensed limits.¹ In support of the request, CBS states that it is preparing to convert Station KYW to a Method of Moments ("MOM") proof of performance. CBS states that it has replaced one sample line and a defective jumper cable, and that the system is now stable. CBS states that it plans to replace the existing sample loops with voltage divider sampling devices, complete a MOM proof and file and application for license.²

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

¹ KYW is licensed for operation on 1060 kHz with 50 kilowatts, unlimited hours, employing the same directional antenna pattern daytime and nighttime (DA-1-U).

² A similar STA was granted on January 7, 2010, and expired on July 7, 2010.

Our review indicates that the licensee has made progress toward restoration of licensed operation, but additional time is required for completing the work. Thus, extension of STA is warranted.

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station KYW may operate with parameters at variance and/or reduced power while maintaining monitor points within licensed limits. Upon completion of necessary measurements and adjustments, Station KYW may operate its substantially adjusted directional antenna pattern with operating parameters derived from the MOM model, pending the filing of an application for modification of license³. It will be necessary to further reduce power or cease operation if complaints of interference are received. CBS must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. See 47 CFR § 1.1310.

This authority expires on **December 1, 2011**.

Sincerely,

A handwritten signature in black ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.

Charles N. Miller, Engineer
Audio Division
Media Bureau

cc: CBS Radio East Inc.

³ During this mode of operation, operating parameters shall be maintained within $\pm 5\%$ current ratios and $\pm 3^\circ$ phase of the model-derived parameters, which must be posted with the station license along with a copy of this letter.
